Used For codeine-cough-syrup-copy

Dextromethorphan codeine-cough-syrup-copy belongs to a group of medications called *antitussives* (cough suppressants). This medication works by **suppressing dry, hacking coughs.** It is usually used for a short term to control coughing associated with the flu, a cold, or due to inhaled irritants.

This medication may be available under multiple brand names and/or in several different forms. Any specific brand name of this medication may not be available in all of the forms or approved for all of the conditions discussed here. As well, some forms of this medication may not be used for all of the conditions discussed here.

Your doctor may have suggested this medication for conditions other than those listed in these drug information articles. If you have not discussed this with your doctor or pharmacist or are not sure why you are taking this medication, speak to your doctor or pharmacist. **Do not stop taking this medication without consulting your doctor.**

Recommended Use

For adults, the recommended dose of dextromethorphan is 10 mg to 20 mg taken by mouth every 4 hours, or ...en by mouth every 6 to 8 hours. The maximum daily dose for adults is 120 mg.

For children 6 to 11 years of age, the recommended dose is 5 mg to 10 mg taken by mouth every 4 hours. The maximum daily dose for children is 60 mg.

This medication is not recommended for children under the age of 6 years.

Dextromethorphan may be taken with food or on an empty stomach.

There may be different strengths of dextromethorphan products available. Make sure you read the label and ask your doctor or pharmacist how much and how often you should take it.
